

gorillapod FOCUS™

GorillaPod Focus is the latest in a growing, award-winning series of uniquely, bendable tripods, engineered to support SLR cameras with larger telephoto lenses or digital video cameras. Designed with professionals and motivated amateurs in mind, the Focus is the biggest, strongest GorillaPod yet.

Weighing just 500 grams and measuring only 9.2cm x 29cm without packaging, the GorillaPod Focus provides the stability of a standard tripod at a fraction

of the weight and size. Sturdy machined aluminium sockets, debuting in an anodised gunmetal finish, offer incredible flexibility while ensuring a rock-solid hold in almost any environment. The GorillaPod Focus uses a stainless steel screw for maximum strength to support an amazing 5 kilograms of gear. It's shipped with a 1/4"-to-3/8" adapter screw in place and can be used with or without a professional tripod head.

Cleverly designed to help capture "hard to get" images like time-lapse, available-light, night-time or long-exposure, the GorillaPod Focus helps photographers refine their imaging skills. Wrap it around a railing, twist it around a tree branch, loop it onto a shopping cart, stand it on a table in the studio, or perch it on a rock during a hike! The possibilities for taking unique images are endless. And it makes a great travel companion, folding up to fit in most photographic bags.

SPECIFICATIONS

Height:	29cm (11.42 in.)
Weight:	500g (17.64 oz)
Max. weight supported:	5kg (11.02lb)
