

# gorillapod

## MAGNETIC™

The Gorillapod, featuring flexible, wrappable legs, has long been the most versatile tripod for photographers on the go. With the addition of super-strong magnets in the feet, you can now position the flexible tripod on any magnetic surface. The magnetic feet, together with Joby's award-winning ball-and-socket legs ensure that the Gorillapod Magnetic will firmly secure your compact digital camera or mini video camera to virtually any surface - wherever your travels take you!

### FEATURES

- Three neodymium magnets allow you to secure the Gorillapod Magnetic to any magnetic surface - fridge door, car hood, lamp post - the possibilities are endless.
- Fully articulating legs allow you to stabilise your camera on any nonmagnetic surface as well.
- Rubberised ring and foot grips provide extra gripping power for enhanced stability in difficult terrain and won't damage delicate surfaces like paint.
- The slim-line quick-release clip stays connected to your camera and snaps into the Gorillapod Magnetic for instant set-up.
- A lock ring provides extra security to ensure your camera stays safely attached.
- Compact and lightweight, the Gorillapod Magnetic is ready for your next adventure; throw it in your pocket or backpack and go!
