

gorillatorch. SWITCHBACK™

This combination lantern-headlamp uses the same LED light array in a single form factor to avoid the need to carry two separate lights. Produced with the latest in high-performance materials and LED technology, the Gorillatorch Switchback combines exceptional light quality with innovative product design.

With 5 powerful LEDs, including a 130-lumen CREE® XLamp® XP-G LED spotlight, 6 brightness settings and an adjustable dimmer switch, this social-to-solo lighting product is an overflowing cauldron of beautiful light. The 92% ultra-efficient holographic lens produces brilliant, even light that is easy on the eyes when viewed directly – a vast improvement over traditional-style lanterns available today.

As a lantern, the Gorillatorch Switchback is capable of illuminating an 8-person family tent or small cabin, making it the ideal light for any social gathering – from meals at the campsite, to an evening game of cards on

the patio. The Gorillatorch Switchback can easily hook to the inside of a tent, sit on a table or attach to a branch using the included flexible lantern stand.

The integrated design allows for a quick transition to headlamp mode, with an ergonomic woven headband that can be comfortably worn for hours. The Gorillatorch Switchback can illuminate a trail up to 18.3 metres ahead, with two additional white LEDs for flood lighting and two red LEDs to preserve night vision.

Built to last throughout a weekend of outdoor adventures, the Gorillatorch Switchback uses two easy-to-find AA batteries for a battery life of up to 72 hours. The flexible lantern stand also doubles as a tripod for a point-and-shoot camera when using the supplied standard camera screw.

FEATURES

- Five powerful LEDs One ultra-bright 130-lumen CREE® XLamp® XP-G LED as the primary lamp; two white LEDs for flood lighting; and two red LEDs to preserve night vision
- Easily transforms for multiple uses Integrated, adaptable design allows product to seamlessly transform from a high-performance headlamp to traditional campsite lantern to hanging dome lamp
- Compact and lightweight Easy to carry and stow, even on your most extreme outings
- 92% ultra-efficient holographic lens Brilliant, even light profile illuminates large areas with ease
- Flexible, wrappable legs Attach to almost anything for ideal outdoor light positioning
- Stand doubles as a compact camera tripod Added versatility – no need to take a separate tripod for your point-and-shoot camera
- Ergonomic headband design Adjustable band ensures comfort over hours of heavy trail use
- IPX-4 water resistant Powerful light for the toughest environments
